UTICAJ KULTURE NA RAZVOJ EMOCIJA

U ovom radu pokušaćemo da prikazemo kako na razvoj emocija, na njihov kvalitet, intenzitet, bihejvioralnu ekspresiju, organizaciju i upravljanje utiče kultura. Namera nam je da predstavimo kako i kada biološko nasleđe koje je neosporno u razvoju emocija dolazi u interakciju sa kulturom i zajedno utiču na manifestacije emocija. Pored toga, govorićemo i o najvažnijem agensu koji utiče na socijalizaciju emocija, odnosu roditelj – dete, u kome je roditelj medijum kroz koji kultura ostvaruje svoj uticaj na razvoj emocija kod deteta.

Ključne reči: kultura, emocije, razvoj, odnos roditelj – dete

CULTURAL INFLUENCE ON THE DEVELOPMENT OF EMOTION

In this paper we will try to show how does culture affects development of emotions, their quality, intensity, behavioral expression, organization and management. Our intention is to present how and when the biological heritage that is indisputable in the development of emotion comes in the interaction with the culture and together affect the manifestation of emotions. In addition, we will speak about the most important agent that influences on the socialization of emotions, relationship parent – child, in which the parent is a medium through which culture achieves its influence on the development of emotions of children.

Keywords: culture, emotion, development, relationship parent – child
