RELACIJE IZMEĐU LOKUSA KONTROLE I SKLONOSTI KA PREVARAMAU LJUBAVNIM VEZAMA

U okviru ovog istraživanja cilj je bio ispitati i analizirati relacije između lokusa kontrole i sklonosti ka prevarama u ljubavnim vezama. Relacije su posmatrane između dimenzija lokusa kontrole: Internalnost, Moćni drugi i Šansa i subskala na skali za ispitivanje sklonosti ka prevarama u ljubavnim vezama: Emocionalna i Seksualna subskala. Istraživanje je obavljeno na uzorku od 253 studenta Univerziteta u Istočnom Sarajevu. Tokom ovog istraživanja utvrđene su i analizirane relacije između navedenih konstrukata, dobijeni rezultati su ukazali na postojanje statistički značajne korelacije između dimenzije Eksternalnost (Moćni drugi i Šansa) i sklonosti ka prevarama u ljubavnim vezama na obe subskale, u skladu sa tim može se izvesti zaključak da osobe koje odlikuje dimenzija Eksternalnost više ispoljavaju sklonost ka prevarama u ljubavnim vezama u odnosu na osobe koje odlikuje dimenzija Internalnost.

Ključne reči: lokus kontrole, sklonost ka prevarama, emocionalna prevara, seksualna prevara

RELATIONSHIP BETWEEN LOCUS OF CONTROL AND PROPENSITY TO INFIDELITY IN ROMANTIC RELATIONSHIPS

In this research, the goal was to examine and analyze the relation between locus of the control and propensity to infidelity in romantic relationships. Relations are observed between dimensions of the locus of the control: Internality, Powerful others and Chance and subscales on the scale for examining the propensity to infidelity in romantic relationships: Emotional and Sexual subscale. The research was conducted on a sample of 253 student form University of East Sarajevo. During this research relation between constructs were determined and analyzed, the obtained results indicated the existence of a statistically significant correlation between the dimension Externality (Powerful others and Chance) and propensity to infidelity in romantic relationships on both subscales, accord to this we can conclude that persons which is distinguished with dimension Externality more express the

propensity to infidelity in romantic relationships, then persons who are distinguished with dimension Internality.

Keywords: locus of the control, propensity to infidelity, emotional infidelity, sexual infidelity
