NARKOMANIJA MLADIH

Među mladima, srednjoškolcima, pa i starijim osnovcima, je sve više korisnika duvana, alkohola i droge. Posebno je alarmantan sve veći broj narkomana. Zloupotreba droge je osobito karakteristična za moderno društvo. Droga se više ne događa negde drugde i nekima drugima, ona je ovde među nama. Ta pojava u velikoj meri utiče na društvo u kojem se ti narkomani nalaze i narkomanija se može suzbiti samo dobro organizovanom prevencijom i akcijom, upoznavanjem široke populacije o drogama i njenim štetnim delovanjima na društvo. Taj fenomen izvire iz napetosti koje nastaju zbog visokih zahteva koje društvo nameće pojedincu a droga se uzima kao sredstvo za koje se očekuje da olakša svakodnevno suočavanje sa problemima. Droga osvaja mlade, donja starosna granica se sve više spušta, pa je pored srednjoškolaca uzimaju i učenici starijih razreda osnovnih škola. Upravo zbog toga, neke škole u saradnji sa lekarima i policijskim stručnjacima organizuju sastanke sa učenicima, roditeljima, nastavnicima, kako bi se upoznali sa ovim problemom, a cilj je da deca ne posegnu za drogom, odnosno da prestanu sa njenim uzimanjem.

Ključne reči: droga, narkomanija, mladi

DRUG ADDICTION AMONGST YOUNGSTERS

There are a growing number of consumers of the tobacco, drugs and alcohol among young people, high school pupils, even among older elementary school pupils. Particularly alarming are a growing number of drug-addicts. Drug abuse is particularly characteristic for the modern society. Drug consuming is not happening somewhere and to someone else, it is amongst us. That occurrence has much influence to the society those drug addicts are living in. Drug addiction could be repressed only by well organized prevention and action, getting general population to know more about drugs and its harmful influence to the society. That phenomenon rises from the tension because of the high demands which the society

puts in front of the individual, so the drug consuming seems like a good mean to alleviate everyday problems' facing. Drugs take over young people, including even younger age group, and thus, besides secondary school pupils, elementary school pupils become consumers. Just because of that, some schools in the cooperation with physicians and police professionals organize meetings for pupils, parents and teachers. Their aim is to get acquainted with the problem, so pupils would not reach drugs, or they would quit consuming.

Keywords: Drugs, drug addiction, young people
